### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 25, 2009, has been entered.

Claims 5, 7, 11 and 12 have been amended. Claims 1-4, 6 and 9-10 have been cancelled. Therefore, Claims 5, 7, 8, 11 and 12 are pending in this office action.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d) or (f), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

3. Information disclosure statement (IDS), submitted May 7, 2009, has been received and considered by the examiner.

### ***Claim Rejections - 35 USC § 103***

4. The rejection of Claims 5-8 and 10-12 under 35 U.S.C. 103(a) as being unpatentable over Walker et al. (US 6,004,689) in view of Takeno et al. (US 6,428,925

Art Unit: 1795

B1), have been overcome based on the amendments to the claims and the arguments presented on pages 6 and 7 of the Remarks dated March 25, 2009.

***Reasons for Allowance***

5. Claims 5, 7, 8, 11 and 12 are allowed.

6. The following is an examiner's statement of reasons for allowance: the instant claims are to a battery pack, comprising a housing forming only one compartment; a plurality of battery cells located in said one compartment of said housing and having longitudinal axes; and heat-diffusing means for diffusing heat from said battery cells, said heat diffusing means including a wall of said housing which is peripherally adjacent to said battery cells from outside of said battery cells and is shaped so that it forms at least one peripherally closed and uninterrupted duct which extends parallel to said longitudinal axes of said battery cells from one axial side to another side of said housing, is open outside at said one and another axial sides, and is closed off in its entirety from said one compartment of said housing in which said battery cells are located, for passing a heat-diffusing medium, wherein said at least one duct is located in a nip between individual ones of said battery cells and has wall regions that rest in form-locking fashion against said battery cells that are located adjacent to said wall regions.

The most pertinent prior art has been presented. The prior art does not teach the claimed invention.

With regard to Claims 5, 11 and 12, Walker et al. and Takeno et al. do not teach or fairly suggest a battery pack comprising a housing forming only one compartment, a

Art Unit: 1795

plurality of battery cells located in said one compartment and having longitudinal axes; a heat diffusing means for diffusing heat from the battery cells, said heat diffusing means including a wall of said housing which is peripherally adjacent to said battery cells from outside of said battery cells and is shaped so that it forms at least one peripherally closed and uninterrupted duct which extends parallel to said longitudinal axes of said battery cells from one axial side to another side of said housing, is open outside at said one and another axial sides, and is closed off in its entirety from said one compartment of said housing in which said battery cells are located, for passing a heat-diffusing medium, wherein said at least one duct is located in a nip between individual ones of said battery cells and has wall regions that rest in form-locking fashion against said battery cells that are located adjacent to said wall regions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
